The Evening Star

is the Oldest and most firmly established newspaper published in the District of Columbia, having won the A CHANCE SELDOM OFFERED high position it holds in the confidence of the people of Washington by forty years of faithful and unswerving devotion to their interests, without regard to any other influence or con sideration whatsoever.

THE STAR is the Largest paper published in Washington, with a general equipment and printing facilities three-fold greater and better than those of any other Washington paper; and, having the full Day Reports of both the New York Associated Press and the United Press, supplemented by an unequaled service of Exclusive Special Dispatches from all prominent points in America and Europe, it prints more and fresher Telegraphic News than any other Washington paper can possibly supply, furnishing at the same time a greater amount and better quality of Local, Domestic and General Intelligence, and a larger quantity and higher grade of Original and Selected Literary Miscellany than any paper

Being delivered at the homes of regular subscribers for the trifling sum of ten cents per week, THE STAR is much the Cheapest paper published in the District, quantity and quality of contents being considered.

THE STAR'S circulation in the City of Washington is more than three times larger than that of any other newspaper, and the number of its readers more than five times as many. It is therefore in that (or even greater) proportion the Best advertising medium in the District. On this point there is no ground for argument or doubt, even. It is the common testimony of the business community, and generally admitted.

Note This Point.

THE STAR gives the exact figures of its circultion every week, and cheerfully opens its books and press and delivery rooms to any person having interest in the correctness of its statements, so that its patrons know precisely how much publicity they are getting when they buy space in its columns.

No other daily newspaper published in Washington dares subject itself to this decisive test.

"DRUG NEWS" BY E. P. MERTZ.

Everybody buys draws. A great many people pay entirely too much for them. Yet it is their fault. At considerable expense we have pub-lished a complete catalogue with price list of all the drugs usually found in a first-class drug store. Some druckists, in a feeble way, have attempted to meet our prices. There are yet a great many who sell at our prices only when great many who sell at our prices only when compelled to by the customer. You do not like to ask for chance when you are overcharged, so you submit to the extortion. You are sure of the lowest price and save all this trouble in buying here. We have a specified price for each article, the same price to all, and we will gladly mail you one of our catalogues upon request. It should be on the library table in every house.

Mrs. Thomas Riggs has invited her friends to a tea at her residence, No. 26 Iowa circle, on Wednesday, January 7, from 3 to 6 o'c' ck, when she will introduce Miss Riggs, her daugh-

Ex-Surgeon General and Mrs. Moore last

Ex-Surgeon General and Mrs. Moore last night gave a dinner in honor of Cardinal Gibbons at their home on 16th street. Cardinal was the prevailing color of the decorations and the menu cards bore the cardinal's crest, his name and the date in crimson lettering. The guests who sat down with the cardinal were Gen. and Mrs. Butterfield of New York, Senator and Mrs. Manderson, the Chief Justice and Mrs. Fuller, Dr. and Mrs. Hammond and Mrs. Gen. Miles. After dinner a company of about Gen. Miles. After dinner a company of about sixty guests joined the diners. Mrs. Moore presented each new arrival to the cardinal, and presented each new arrival to the cardinal, and at a later hour supper was served. Among the guests were Mrs. McKee, Mrs. Dimmick, Minister Roustan, Mr. Boenfre, Senor and Mme. Romero, Bishop Keane, Gen. and Mrs. McKeever, Senator and Mrs. Hale, Adjutant General and Mrs. Kelton, Gen. Sherman, Justice and Mrs. Field, Mrs. Condit Smith, Mr. and Mrs. Pollok, Col. Berret, Senator, and Mrs. Dolph, ex-Marshal and Mrs. A. A. Wilson, Gen. and Mrs. Benet, Dr. Toner, Gen. Schofield, and Mrs. Benet, Dr. Toner, Gen. Schofield Mr. and Mrs. A. Leo Knott, Gen. and Mrs Mrs. Van Vliet, Senator and Mrs. Cockrell, ex-Governor and Mrs. Carroll, Gen. and Mrs. Vincent, Senator and Mrs. Wolcott, Gen. and Mrs. J. Mills Brown and Gen. Williams.

Miss Fisk and Miss Flannagan of New York Miss Fisk and Miss Flannagan of New York city, Miss Moore of Orange, N.J., Miss Woodruff of New York, Miss Weber of Brooklyn and Miss Swinton of Port Jarvis, N.Y., who are to be Miss Mildred Fuller's bridesmaids, are now the guests of the chief justice's family, and will remain until after the wedding, which will take place on January 5. On Friday evening of this week Mrs. Fuller gives a dinner party of twenty-six covers in honor of the bridal party, and on Saturday night Mr. Wallace, the groomelect, will dine his ushers. Mr. Thomas Wallace of Takoma, a banker and brother of the groom, will be his best mar.

Secretary and Mrs. Blaine will give a cabinet dinner on Saturday next to meet the President and Mrs. Harrison. The Vice President and Mrs. Morton will dine the President and Mrs. Harrison and the cabinet on the evening of January 9.

Mr. and Mrs. W. F. Mattingly gave a young people's party last night at their house on H

At Mrs. John Cropper's tea yesterday aftersoon the hostess wore a demi-toilette of mauve ropper, her sister-in-law, in whose honor the party was given, wore French gray silk and brocade. In the tea room Mrs. Henry Johnson, Mrs. McLane, Mrs. Staunton and Mrs. C. C. Mrs. McLane, Mrs. Staunton and Mrs. C. C. Glover showed hospitable attentions to the guests. Among those present were Mrs. Mc-Kee, Admiral and Mrs. Crosby, Mrs. Dimmick, Col. and Mrs. Parker, Mr. and Mrs. Alexander Falls, Miss Breedin, Miss Warnield, Miss Shu-feldt, Miss Grace Davis, Mrs. N. S. Lincoln, Mrs. Viete, Mrs. Poor, Mrs. Wm. Johnson, Miss Biddle.

Commodore and Mrs. Walker gave a little folks' tea during the early hours of yesterday The marriage of Mrs. Sarah Lee Woods and Lieut. Nixon, U. S. N., will take place at the Church of the Covenant at noon on January 29. Mrs. Wm. R. Riley of No. 7 Iowa circle has issued invitations for a tea Tuesday, January 6, from 4 to 7.

Corps, No. 4. W.B.C., to the commander and comrades of Burnside Post, No. 8, and other friends on New Year day will be postponed on account of the sudden death of Mrs. Sarah E. Armour, a member of the corps. TION OF TRANSFERS, MOTIVE POWER, ETC. Pursuant to their advertisement the Comnissioners devoted a large portion of this Miss Lou Devereux and Miss Bina Egan of

norning to a hearing on house bill 12754, which Boston are spending the holidays with Mrs. Frank N. Devereux at her home on I street. has for its object the amending of the charter of the Rock Creek Railway Company. The bill, Mrs. T. B. Childs and Mrs. Joseph H. Vendig. nee Mamie and Sadie Glover of New York city, will be in Washington today and remain until after New Year with their mother, Mrs. M. run its tracks as follows: Mrs. Commissioner Douglass is suffering from

"Beginning at the intersection of 18th street north and Florida avenue, thence south along 18th to P street north, thence east along P to 15th west, thence south along 15th to 1 street north, thence east along I to 15th street west, thence south along 15th street to Pennsylvania avenue, and also beginning at the intersection of U street north and 14th street west, thence east along U to 10th street west, thence east along U to 10th street west, thence east along T to Florida avenue, thence along Florida avenue to New Jersey avenue to B street north." There were present at the hearing Messrs. Francis G. Newlands, president of the company; Edward J. Stellwagen, the vice president; Gen. A. J. Warner, superintendent; W. K. Schæppf, engineer; Col. Wright and Mr. John T. Arms.

OBJECTIONS TO THE BILL. a severe cold and will be unable to receive on New Year day, but the honors of the house will be done by her daughter, Mrs. Henry Macfar-

THE BOCK CREEK RAILBOAD.

ert Platt, United States navy, has returned home from a two months' visit in Salem, Mass Mrs. J. J. Albright of Buffalo, N. Y., and her three children arrived here this morning for The latter was the only objector present, althe purpose of attending the masquerade to be given by their cousins at Belmont. The party will be increased tomorrow by the arrival of Mr. Clinton Curtis of Yale College and Mr. Frank Rainy of Winona, Minn. though Commissioner Douglass read several petitious against the road. One of these petitions came from the residents and property owners of 18th street, who thought the street owners of 18th street, who through too narrow to accommodate a railroad.

Mr. Arms said, when the objectors to the bill for that his objections were constituted for that his objections were constituted for the constitution. Mrs. Barry Bulkley will be at home, 1325 30th street, on Wednesdays in January after ained in the petition read by Commiss Miss Mollie Owings of Frederick, Md., who has been visiting Miss Marie Harrington, will return to her home on Thursday.

IN FAVOR OF THE BILL. Mr. Francis G. Newlands then spoke in favor of the bill, giving in detail an outline of what the road had done and what it expected to do. He said that already the company had shown He said that already the company had shown its good faith by expending over \$200,000 in grading, and had contracts let for bridges across the Klingle ford and Rock creek aggregating \$150,000. The road, he said, would be running about the 1st of June next. Mr. Newlands then explained the desirability of the road and the route as proposed. He was not wedded to any one route so long as the company had any one route so long as the company had termini at Riggs Bank and the Capitol. The legislation, but their leaders are not yet confident of being able to hold together all of the main object of the road, he added, was to get from the center of the city a direct line to the Zoological Park.

THE QUESTION OF TRANSFERS Commissioner Douglass desired to know if any provision had been made for transfers from other roads.

The conversation drifted then to the general an extraordinary interest and furnishing unquestionable security. This is suggested as the very natural result of free coinage.

Matters are getting into such a shape, however, that the leading silver men see that they must take some action promptly or else wait for another Congress to pass a free coinage bill. They find no promise of speedy legislation on finance in the adoption of isting tracks of the Metropoitan railroad on 18th street or the Washington and Georgetown tracks on 14th street could not be utilized: gentlemen interested in both companies and found that there was considerable opposition to any such arrangement.

road, explained the route and exhibited a map showing the lines as at present decided upon and the route proposed.

Col. Robert asked if the company proposed to lay a double track, and if so who would widen the street.

Mr. Douglass said that a way out of the diffi-culty might be for the company to run up one street and down the other. Gen. Warner said this was impossible, as the

Gen. A. J. Warner, the superintendent of the

mine; but if it is not applied promptly the election bill may stand in the way of silver legislation for some time yet without being itself endangered by the delay.

The managers thus far have given no assurance that if the cloture rule is adopted the election bill will be disposed of at once.

Silver men therefore feel that they will have gained nothing by the adoption of cloture, but will have put themselves in the power of the anti-silver men if they assist in clearing the cost would be too great. THE MOTIVE POWER. Col. Robert inquired what motive power would be used, and Gen. Warner said that will have put themselves in the power of the anti-silver men if they assist in clearing the way for action on the election bill. Without any assurance that the action will be had at once they will have abandoned about the only weapon outside of the city limits the overhead electric system would be employed. Inside of cided upon. Col. Hobert said he was in favor of the storthey have.
Therefore some of the leaders feel that there

age battery system and believed it was only a matter of a few months before a system of storage batteries would be perfected. should be prompt action on their part and that What they can accomplish depends upon their ADVISABILITY OF A CROSS-TOWN ROAD. A general discussion followed on the needs of success in holding their own men together. Washington for additional railroad facilities, They feel that every moment taken and the conversation drifted to the advisability of a cross-town road. Commissioner Ross called at

fact that at present the High School had no railroad facilities from the east. All present agreed that a cross-town road along S street would be the most acceptable. would be the most acceptable.

Mr. Douglass said that he was of the opinion cross-town railroad to pass over, as it was prac-tically straight and did not interfere with any

circles. It was thought that the road, as pro-posed, interfered with the route proposed by the East and West Washington traction rail-The bill was sent for and it was discovered that the routes were entirely different, save be-tween the Baltimore and Ohio depot and the Capitol along New Jersey avenue.

A PROPOSED CHANGE OF BOUTE. Mr. Newlands called attention to the fac which resulted in the killing of about 300 In-dians and several soldiers, including Capt. Wal-lace, with a number wounded. that as there was no objection to any portion of the road save along that part of the route on 18th street between Q and R the Com-missioners approve all the remainder of the road and allow the company to further amend by coming down 18th street as far as S, thence east along S to 17th, and down 17th to connect on White Clay creek, just below Red Cloud's house, opened fire on the agency from the hillwith the proposed tracks on P street.

The Commissioners promised to give the matter careful consideration before reporting.

It is probable that the work of surveying the

and and laying down the lines of the Rock

band have retreated in a northwesterly director from the agency, and it is supposed he is try-ing to make his way back to the Bad Lands Thus far the Pine Ridge Indians have taken no active part in the war, but Big Foot, Slow Bear THE ROCK CREEK PARK. The Surveys May All Be Completed in Janu

Creek Park will be completed during January. Capt. Rossell has pushed the work so far that ne has now laid down on the map all the exterior lines of the park. The work of ascertainng the exact boundaries of the different properties included in the park is going on and is rendered somewhat slow by the difficulty expefrom the seat of the Indian troubles that were rienced in finding old boundary stones. The in his possession over to the President and exterior lines as laid down as the result of the officially communicated the sad news of the survey include, as it is estimated, 1,980 acres, death of Capt. Wallace and his men to his chief. or twenty acres less than the maximum limit allowed by law. On a map prepared in Capt published. The officials concluded that inas-much as Geg. Miles has already been given am-ple discretionary power to act in any emer-Rossell's office this park of 1,980 acres shown with an irregular-shaped lake about 100 acres in area in the northern part of ple discretionary power to act in any emergency it is not necessary to send him any further instructions. The Secretary had a conference with Gen. Schofield immediately after his return from the White House, but no new action was decided upon. The Secretary will not express any opinion as to yesterday's fight, while Gen. Schofield merely says that the treachery of the Indians, which led to the skirmish, was to have been expected. it. This lake is supposed to be formed by damming Rock creek. The present park com-mission, however, have nothing to do with the mission, however, have nothing to do with the future improvement of the park, their duty being to secure the land to the government. After their work is done the care of the park devolves upon the chief of engineers of the devolves upon the chief of engineers of army and the District Commissioners. army and the District Commissioners. When the map for which surveys are now being made is completed it will be filed in the recorder of deeds' office and constitute under the law the first step toward the appropriation of the ground by the government. The Commissioners will then endeavor to settle with the land owners by private arrangement, offering them what they consider a fair price. In the cases where no agreement can be reached the matter Adjutant General Kelton remarked: "It was not to be presumed for a moment that the Indians, accustomed as they are to strife, would consent to lay down their arms peaceably and without a protest. There is nothing official consent to lay down their arms peaceably and without a protest. There is nothing official here yet in the way of information to indicate just on what terms the andians consented to come in the second time, but I do not believe that there was any mention made at first of surrendering their arms. They probably came in with the belief that they would be allowed to keep their guns, and when the demand was made on them to give up their rifles and other weapons they revolted. It was too much to ask of them. I do not suppose that there was any positive plan where no agreement can be reached the matter will go into court for settlement. If it be found that the whole 1,980 acres cannot be puris probable a new map will have to be prepared, cutting down the dimensions of the park
to fit the appropriation. After the park is secured there will be considerable work to be
done in the way of assessing benefits to
property in the vicinity. Capt. Rossell,
in speaking of the matter to a STAB reporter
today, expressed a doubt whether the
work required to secure the park would be advanced far enough to justify an appropriation
for the improvement of the park. He thought
the first improvement called for to make the
park available was the construction of roads
and bridle baths. After that money could be
spent to advantage in building bridges. volted. It was too much to ask of them. I do not suppose that there was any positive plan for the attack formed, but the matter was probably talked over among the Indians before they reached the camp. The Indians are well armed with Winchester hunting rifles, and at close ranges are better shots, as a rule, than the soldiers. An Indian's shot must kill. He cannot afford to miss, for en his ammunition depend his life, his food, his safety. He has all of the instincts that tend to good marksmanship, a quick eye, a sure touch

INDUSTRIAL EDUCATION. Papers Read and Discussed by the America

ECHNICAL EDUCATION CONSIDERED FROM SET-ERAL DIFFERENT STANDPOINTS-THE HIGHEST

The third and last day's session of the Amer ican Economic Association was held this morning in the hall of the Columbian University The attendance was not quite as large as at the as stated in THE STAR, allows the company to previous sessions. The first subject discussed was that of technical education

rial resources of the country and to develop them, but to give them the training needed by workers in the industries - in oth words, fitting men for the trades which will be their future occupation. This form, the speaker said, was what industrial education generally

The third form of industrial education and The third form of industrial education and the one that the speaker proceeded to explain was that which did not seek to prepare men for technical professions or to follow any special trade, but which became a part of the general training of the scholar. Instruction of this character should be engrafted and made a part of the school curriculum, so that the student could gain, in connection with acquiring a general education, the ability to use the hand and acquire the training of the eye. He believed that such an enlargement and enrichment of the present course of training

enrichment of the pres. nt course of training would make better and happier citizens, elevate and dignify labor and enhance the productive power of the community. PROF. PATTEN'S VIEWS. The same topic was discussed from the stand-

point of consumption by Prof. Simon N. Patten. He pointed out that the older economic had thought that the solution of the problem of the improvement of the condition of the working people lay in the increase of producworking people lay in the increase of productive power. The present day had witnessed a great increase in productive power and still the problem was unsolved. Then the importance of distribution was emphasized in the solution of this problem. But the improvement of distribution, the speaker said, had not resulted as expected. He called attention to the fact that while great care had been exercised in the production and distribution of food products yet after all this care when the product reached the consumer it was wasted. product reached the consumer it was wasted. The waste of consumption, he maintained, had increased, and by far the greater part of the food products brought to a great city was wasted. He cited the case of shoes, which, he that while the methods of making shoes and im-proved constantly the quality had decreased, so that now the shoes on the market were lower in quality than was the case years ago. He at-tributed this condition of affairs largely to the fact that the members of the families were not familiar with the methods of production, such as making shoes, cooking food, and as a result they were not able to judge of the quality of the articles produced. Poorer shoes were purchased because of the ignorance of the buyer and food was cooked in an inferior man ner for the reason that this work was left to the ignorant, and they were without proper the ignorant, and they were without proper direction and supervision because the persons upon whom this duty should devolve were themselves incapable of giving intelligent direction. He pointed out that this ignorance on the part of the people of these practical matters was the cause of the waste that was now going on. The lack of knowledge of cooking on the part of peop records but the of cooking on the part of poor people had the effect of limiting the articles of food There was no country, he said, which produced a greater variety of vegetables than this country, and yet he knew no country where vegetables entered so little into the died where vegetables entered so little into the diet of the people. This was because the people did not know how to cook them. In his opinion this view of consumption had a direct and important bearing upon the present condition of the people. He believed that American society needed this kind of education more than any other country. needed this kind of education more than any other country. There was in this country a great ignorance of the art of preparing food for the table. He also spoke of the ignorance of people about mouding clothes and said that it seemed to him that the object of the poor men was to buy a stocking, for example, that would wear out so quickly that it would not need to be mended. . This state of affairs resulted in the mended. In this state of agains resulted in the production of the cheapest and the poorest quality of clothing. He thought that what was needed was the development in people of careful, intelligent habits of consumption, and this was the key of the entire situation.

TRAINING OF EUROPEAN ARMIES. He spoke of the effect that the training which the standing srmies in European countries had in giving habits of care and attention to small details. While he did not believe in large standing armies, yet the lesson to be drawn was that the teacher in America must do what the officer does in Europe. As soon as the teacher takes hold of the scholar in the sysmatic way that the army officer does the re cruit then results may be expected that will im prove the habits of consumption.

OTHER PAPERS ON THE SUBJECT. Papers by Dr. N. M. Butler on technical education from the standpoint of general education and by Prof. James MacAlister on its easy adaptation to school curriculum and management were read by title, as the authors were unable to attend the sessions of the association. An interesting discussion followed the reading of these papers, which was generally partici-pated in by the members.

THE LIMITS OF PUBLICITY. The next paper was on the limits of publicity, by Prof. Davis R. Dewey. The speaker spoke of the growth of publicity in different direc tions as illustrated by the census, the American system of taxation, exhibition of corporate accounts and health statistics. He thought that further extension of this system should be made in regard to the health condition of the made in regard to the health condition of the population. In another direction, he said, further data should be collected in regard to and and supply of products.

MUNICIPAL OWNERSHIP OF GAS WORKS. An interesting paper on "Municipal Owner ship of Gas Works in the United States" was read by Prof. Edward W. Bemis of Vanderbilt University. He said that of the nine cities that University. He said that of the nine cities that now own and operate their gas works in this country one, Hamilton, Ohio, a city of 20,000 inhabitants, has begun too recently to enable results to be given. The other eight, Philadelphia, Wheeling, W. Va., Bellefontaine, Ohio, Henderson, Ky., and four cities in Virginia, Richmond, Danville, Charlottesville and Alexandria, after a fair trial of many years have recently refused to enter. Charlottesville and Alexandria, after a fair trial of many years, have recently refused to entertain good offers from private companies to take the works off their hands. There is most dispute about Philadelphia, which began ownership in 1841, and most foolishly placed the entire control of the works till 1885 in the hands of a self-perpetuating body of trustees, who, being free from responsibility to the people, a primary principle of public linance, naturally abused their powers and became a corrupt body. The bad results finally led to the overthrow of the trust in 1885 and the restoration of the works to public control. led to the overthrow of the trust in 1885 and the restoration of the works to public control. Since then the city management has steadily improved until, in 1889, the cost of over 3,000,000,000 feet of gas, twenty candle power, was only 74 cents per 1,000 feet, no allowance being made for interest and the taxes which a private company would have to pay. Allowing 5 per cent interest and 2 per cent taxes on the cost of duplicating the works, very high figures, the cost of gas would be only \$1.02. The city buys some water gas of a private company, but could make it nearly as cheaply if allowed by the legislature to raise money for constructing the proper works.

Richmond, Va., with a population of 87,000, manufactures gas at 76 cents a thousand feet. An allowance of 6 per cent for interest and 2 per cent for taxes would raise the cost to only \$1.04.

WHERLING GIVES THE BEST RESULTS. Wheeling, W. Va., with a population of 43,000, loes the best of all the cities owning their gas does the best of all the cities owning their gas works. Its output of 115,000,000 feet in the burner costs but 43 7-10 cents, and is sold for 75 cents. A liberal allowance for interest and taxes would raise the cost to only 70 cents. Wheeling secures her coal for about 17 cents per thousand feet of gas in the burner. Most other cities in the east have to pay about 20 cents more for coal, but by-products are very low in Wheeling.

In none of the other five cities does the population exceed 15,000 and so the cost of gas is higher; for the cost of gas making rapidly falls

at least up to 100,000,000 feet a year, with in creese in consumption. But all of these cities have done very well. The cost of making, even with allowance for interest and taxes, exceeds \$1.33 only in the case of Danville, Va. where coal is \$5 a top, or over 55 cents a the sand feet of gas in the burner.

FORM OF INDUSTRIAL EDUCATION—THE LIMITS
OF PUBLICITY—MUNICIPAL OWNERSHIP OF GAS
works.

In most of the cities owning their own works slightly higher wages are paid for common labor than in private-owned works, which some labor than in private-owned works, which some may consider a good thing, and there is a tend-ency toward employing members of the domi-nant political party. But this has rarely gone so far, especially in recent years, as to affect the positions of superintendents and other skilled officers. The superintendent in Rich-mond since 1886 was assistant superintend-ent for the previous sixteen years. The superent for the previous sixteen years. The super-intendent in Danville has had his office for six

intendent in Danville has had his office for sixteen years, in Henderson since the city took charge in 1882, in Charlottesville since 1855. In Alexandria the superintendent now in charge has been out of office only two years in eighteen, yet in all these piaces there have been occasional changes of the party in power.

A study of these fairly representative cities proves the contention of Prof. James and others that in the cities exceeding 10,000 inhabitants the cost of the entire plant is less than \$6 for every 1,000 feet sold during the year, and from \$3 to \$5 in most cities of over 50,000. The capitalization much in excess of this, com-The capitalization much in excess of this, com mon in American cities, and sometimes two to four fold, on which dividends are paid, revealed the monopoly profits of private-owned go

A number of interesting papers were on the program to be read at the session which was held this afternoon. The faunt meeting of the association will be held this evening. It will be in conjunction with the American Forestry Association at the National Museum

PAPERS READ THIS MORNING The session this morning was a general on and the following papers were read: "Notes on

the Variations in the Tertiary and Cretaceons Strata of Alabama, by Daniel W. Langdon: "On the Probable Upper Jurassic and Basal Cre-taceous Beds of the Texas-Arkansas Region, taceous Beds of the Texas-Arkansas Region, Coastward of the Present Palæozoic Arcas, to-gether with Remarks on Pre-existing Condi-tions and Subsequent Erosion," by R. T. Hill; "On the Structure and Petrography of the Piedmont Plateau in Maryland," twenty-five minutes, by George H. Williams; "A Geological Section Across the Piedmont Plateau," sen

nutes, by Charles R. Keyes. NEW FELLOWS ELECTED. The following new fellows were elected:

T. Nelson Dale, assistant geologist in the U.S. geological survey; Orville A. Derby, director of the geographical and geological survey of Brazil; U. S. Grant, Minneapolis, Minn; Edmund Jussen, assistant geologist, United States geological survey; Will U. Sheizer, Saginaw, Mich. Officers were elected: President, Alexander Winehell of Ann Arbor, Mich.; vice presidents. E. K. Gilbert, Washington, D.C., and T. C. Chamberlain of Madison, Wis.; H. L. Fairchild of Rochester, secretary; U. S. Williams, Cornell College, treasurer; members of the council, G. M. Dawson, Ottawa, Canada; J. C. Branner, Little Rock, Ark.; A. W. Clapole of Akron, Ohio; C. U. Hitchcock of Hanwa, N.H.; I. C. White of Morgantown, W.Va.; J. J. Stevenson of New York; Editor W. J. McGee, Washington, D.C.

THE AFTERNOON SESSION. The society met in sections this afternoon and the reading of papers was continued. This afternoon at 5 o'clock the members will at down to a banquet at Willard's. A session will be held this evening and three semi

DISTRICT IN CONGRESS. LINDEN STREET FENCE IN LE DROIT PARK. The fence across Linden street in Le Droit Park was the subject discussed at a special meeting of the board yesterday afternoon. Mr. meeting of the board yesterday afternoon. Mr. A. S. Worthington, the counsel for those who objected to tearing down the fence, spoke at length on the subject, calling attention to the fact that when the subdivision was made it was one of the conditions imposed that the owners should inclose it with a fence. Congressman Butterworth spoke warmly on this side of the question. Gen. Birney gave a detailed history of the fence and the litigation connected with it. The Commissioners will give the subject careful consideration before coming to any decision.
